
Forms 6i - Client Platform Support

Apple MRJ Certification

As you may know, Apple Macintosh client has been certified with Oracle Applications 11i since 09/13/2000.

What is the impact for non-applications Forms customers?

Oracle Forms 6i Release 2 (part of Oracle9i Application Server) is Gold certified with Apple MRJ client .

It is important to note that this certification will apply for Forms only and WILL NOT apply for other Oracle9i Application Server components at this time.

What languages are supported?

Forms Server is certified with Apple MRJ in English only at this time. Certification with other languages will follow.

What are the minimum requirements?

The minimum required Apple Macintosh client configuration is:

Forms Configuration : the applet parameter "separateFrame" must be set to true

Hardware 200MHZ+ PowerPC G3 and above, 128MB RAM, 800x600 display

System Software MAC OS 9.0.4, Microsoft Internet Explorer (IE) 5.0 using MAC OS Runtime for Java (MRJ) 2.2.3 as the default plug-in

Where can I have more information?

The Oracle Applications Release Note for Apple Macintosh, describing system configuration requirements, tuning guidelines, and known limitations for Oracle Applications 11i can be downloaded from :
